

company

Knowing what's BAD, we pursue what's GOOD.

Company Introduction Document

We pursue having for the sake of good.

JE company is a total IT company that pursues making this world from BAD to GOOD through the donation portal Only, AI design services, and various other services in the future.

– EASY

Making complex and difficult things easy and intuitive

– CONNECTED

Connecting everyday life and the world to make life more convenient

– TRUSTED

Trustworthy operations with flawless security

Services Provided

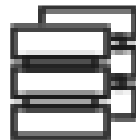

A happy world where everyone laughs

Digital experience is complex through movement and iteration across websites.

Only, while the amount of information in the world keeps increasing, the time users spend using it decreases. To secure this, a portal that integrates everything is needed.

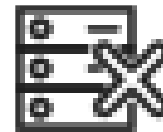

— Distributed information

The search and communication channels are disconnected from each other.

— Inefficiency in operation

Repetitive tasks occur in advertising and content operations.

— Safety Gap

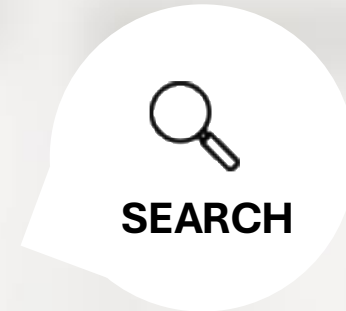

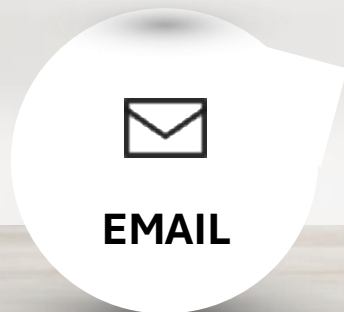

Harmful content and unnecessary information interfere with the user experience.

OUR SOLUTION

Everything can be done and connected through a single unified portal.

Only, organically integrates the necessary functions, from content management onward, through various analyses based on users' activity patterns.

Everything is composed around the four.

Only, we work to make the world more balanced through donations, and everything is centered around email, the gateway to AI search and communication.

Give

An effort to change the world's imbalance and turn that imbalance into balance

Mail

A channel for communication, where even users far away can interact anytime

AI Search

An experience that quickly retrieves the required information according to the user's preference

Media

A place that's fun with a variety of content, including videos and music that everyone desires

EXPERIENCE PRINCIPLE

For busy modern people, an easy and smooth experience is a competitive advantage.

Only, while integrating everything, all functions must be simple enough that even a child would become familiar with them, so as not to be used.

Understand at a glance

A clear information structure that presents key information first

Run at once

Minimize steps and movement from navigation to execution

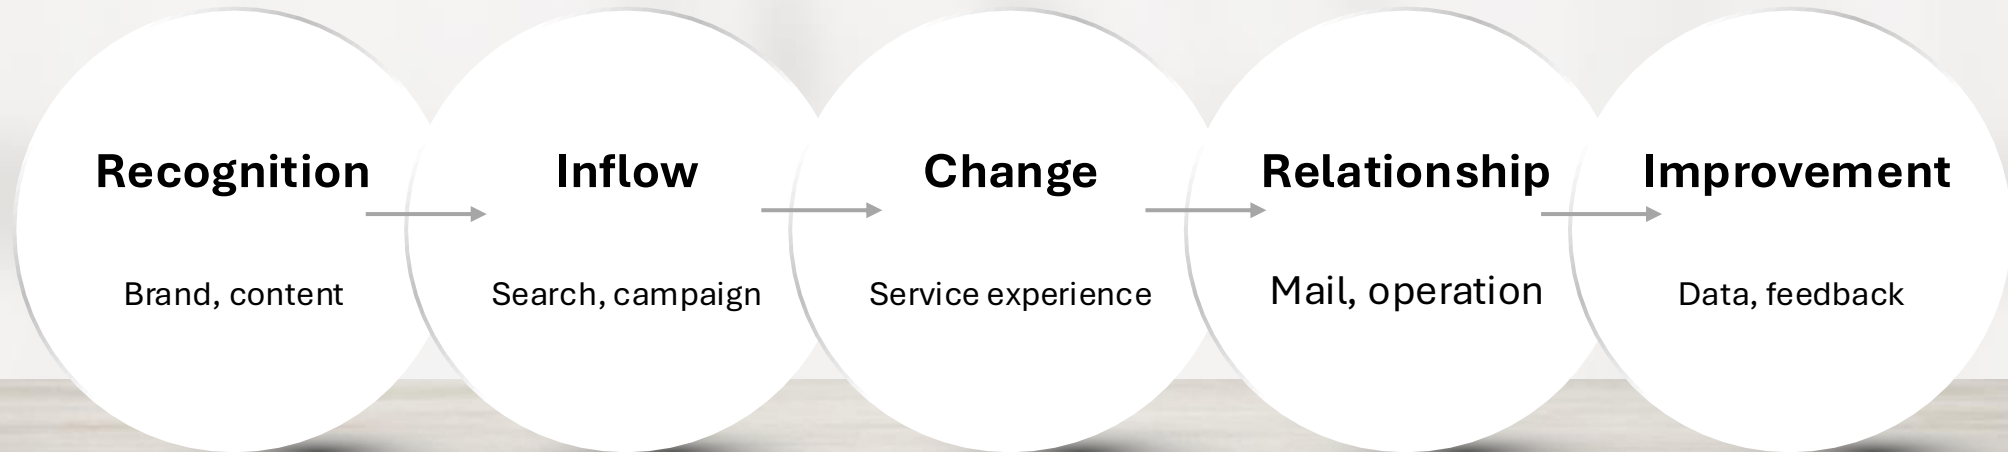

Connected as one

A unified user experience that maintains context across services

From the start of the service to its improvement and growth

Only, is a portal that continues to grow based on user information, and it does not stop at the experience level but keeps evolving.

Services Provided

AI *design*

Designs created from an expert's perspective

Even when using AI design, you don't get all the same output.

JE, a professional designer, meets AI, the results are different. AI design is not all-powerful. It needs to be modified to fit the brand.

Inefficiency of design

An inefficient output that leaves everything to AI

Unwanted output

The result of repeating an imperfect design

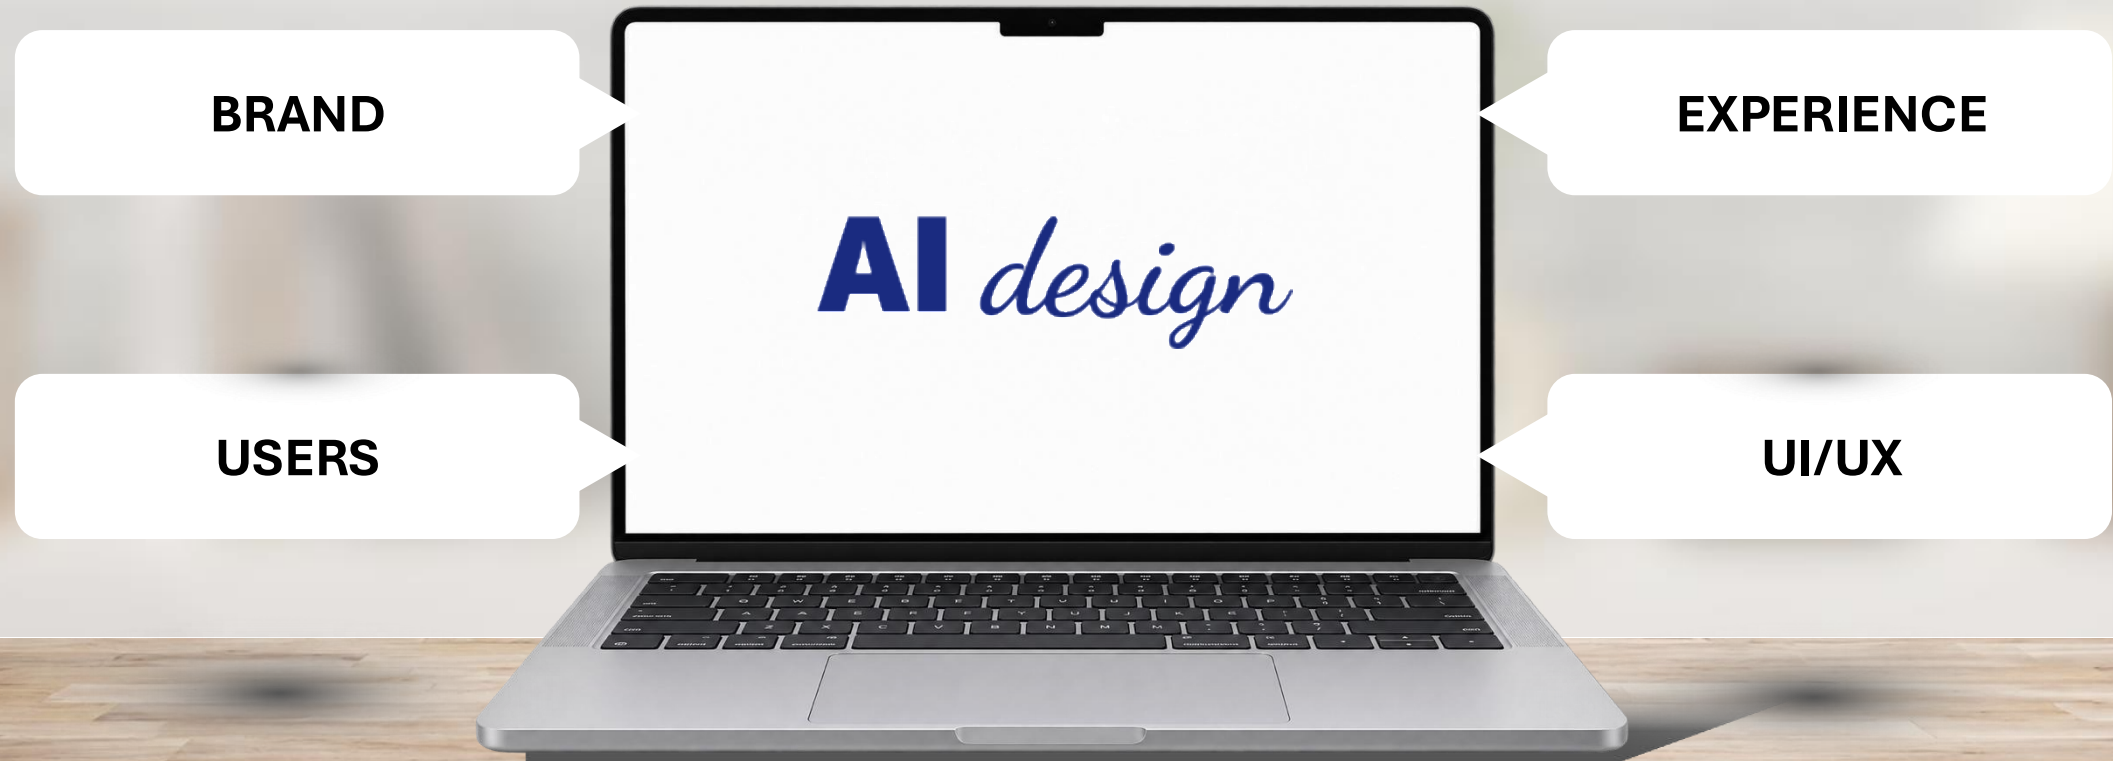

User's insensitivity

A design that compromises because the AI user's sense of aesthetics is lacking

OUR SOLUTION

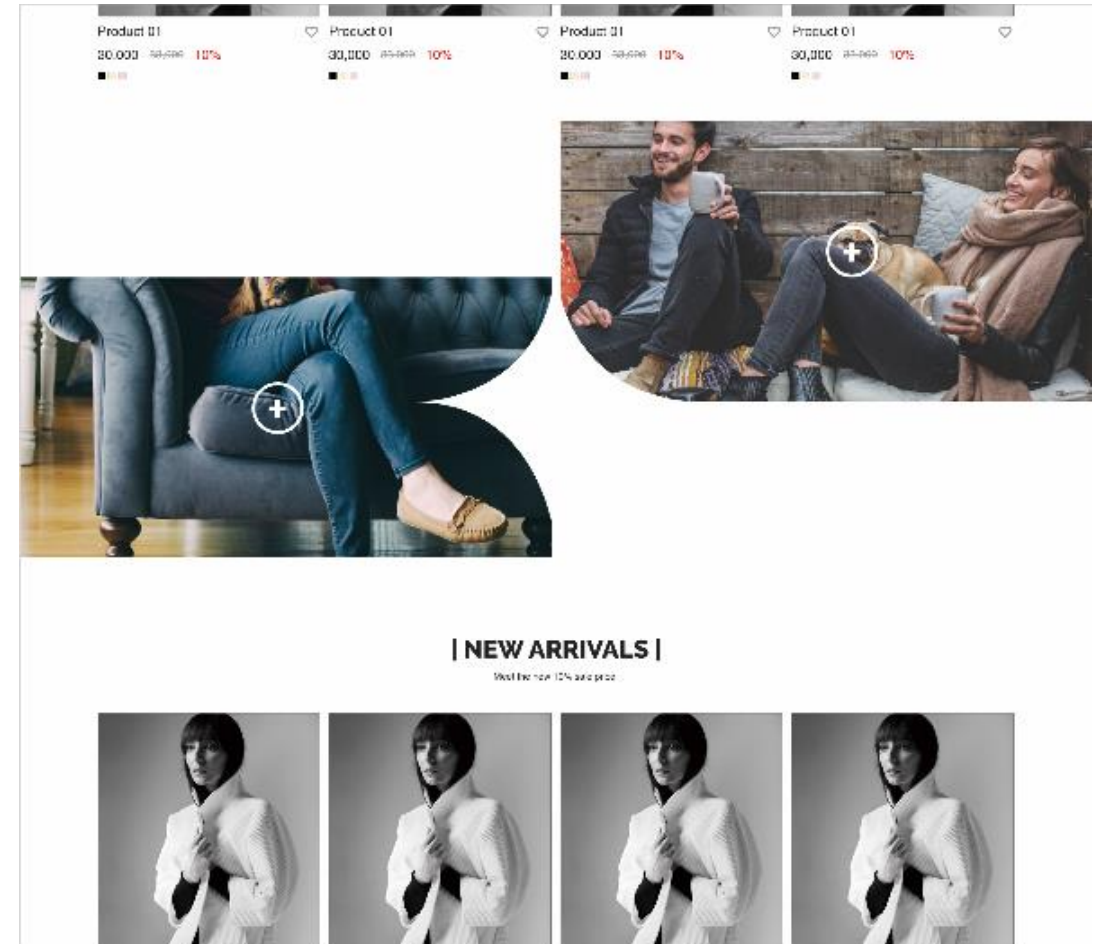

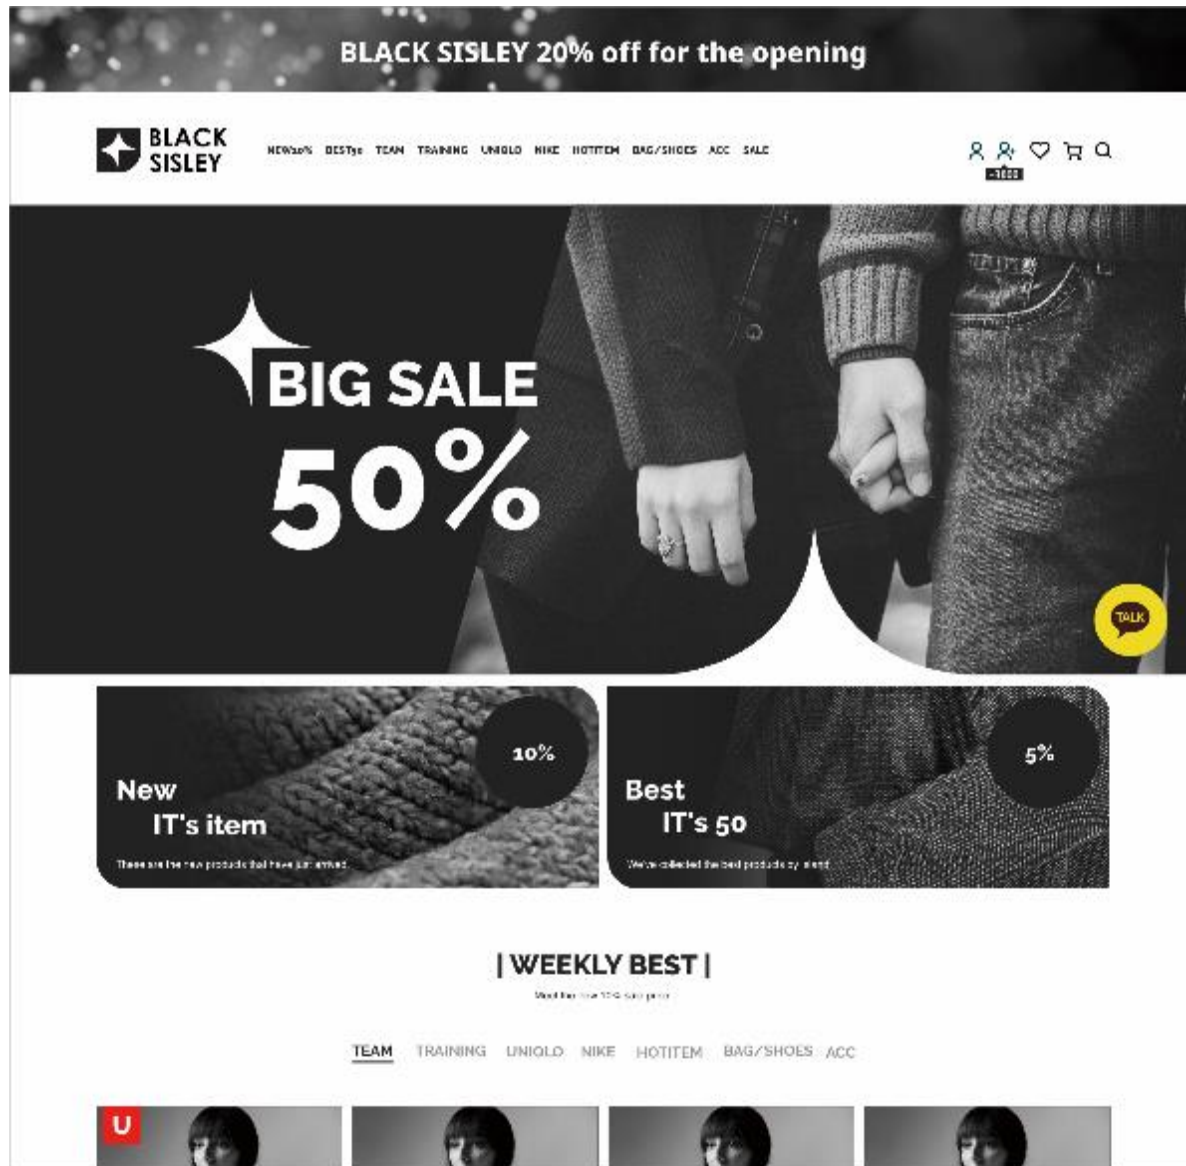

Even AI designs look different when handled by a professional designer.

JE, From design planning to customized design sensibility, we deliver the best design tailored to your brand.

**From custom image generation to designs that
preserve the existing sense of style.**

JE, provides customized designs from the client's perspective on existing websites, editorial design, image editing, branding, and more, from a designer's point of view.

Home page, we have a simple home page
It creates the true value of a company that is not.
The Beginning of True Value Creation, UHome

Domain free, 1 year hosting free, 2 free email boxes provided.
No server maintenance fee, a storage fee for 100MB only.

©2006 International Wildlife Institute. All rights reserved.

Domain free, 1 year hosting free, 10 GB free storage space
affordable from \$9.99/mo. and up to \$69.99/mo.

Like,

It's worth it. It's not just a website.
**a website that highlights the value of
the company Uhome makes it worth it.**

EXPERIENCE PRINCIPLE

We understand the brand and design it comprehensively from start to finish.

JE, We strive to fully understand the client's brand and contribute to sales through customized designs tailored to the target audience.

Understanding the client's intent

Design that accurately understands the client's intent

Customized brand

Accurately understand the brand and deliver it in a customized way

Designed with care

A design crafted with care, leaving no detail overlooked

A design that never falls behind, no matter how much time passes

JE, Creates trend-aligned designs with a forward-looking approach. We create forward-looking designs, not outdated ones.

We will introduce the business I intend to pursue in the future.

JE, In step with the AI era, we will strive to become a leading company of this era through diverse businesses.

Tablet PC used in all directions

A tablet PC that all users can use, designed for industrial use, and can be used anywhere

A highly secure operating system

A secure OS with thorough security, not vulnerable to easy hacking, and encrypts all data, rather than one with weak security

The metaverse that will create a new world

A metaverse that creates a new world, giving every user another space to do everything

Thank you.
